

RoadWay for Governments

View an objective assessment of your entire road network online

See All Road Conditions

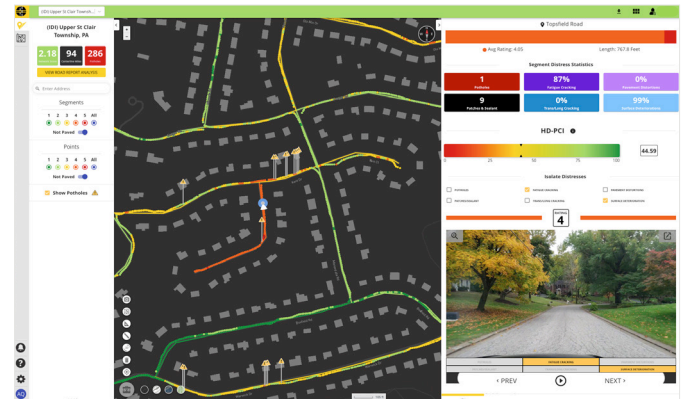

Get a bird's eye view of your entire road network online. Use RoadWay to visually communicate the condition of your road to stakeholders, including local officials and citizens.

Options for individual distress identification and HD-PCI ratings are also available.

Prioritize Maintenance and Make Data-Driven Decisions

Use RoadWay and its objective spreadsheet data to create effective pavement management and maintenance plans. Select roads with the level of damage you want to concentrate on, zoom in on each 10-foot section of road, or virtually drive down any stretch of your network from your desktop.

Share Your Assessment

Give others permission to view your full assessment, or use the Embedded Maps feature to generate code to share your assessment on any website.
