

Construct digital twins with mapped visual data for collaboration, engagement, and evaluation.

Using the power of artificial intelligence, these interactive maps empower you to make data-driven decisions about your environment, and provide digital solutions for industries like civil engineering, utilities, insurance, construction, and the public sector

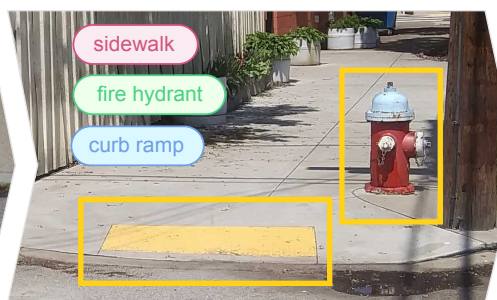

Data-driven decisions begin with clear and actionable information. Upload already-existing visual data to the AgileMapper desktop website or download the AgileMapper mobile app to begin quickly collecting, uploading, and tagging images. Easily create maps and visualize progress with AgileMapper.

Getting Started

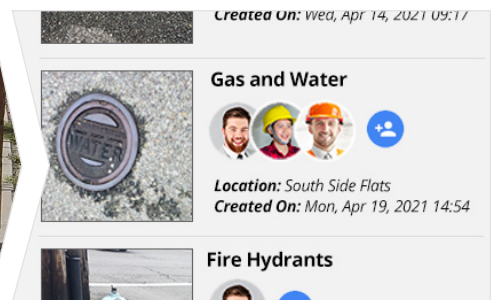

Upload Existing Image Data or Begin Taking Images

Begin collecting images of your assets whenever or wherever you'd like, or upload already existing image data. Each image is automatically geo-tagged, time-stamped, and user-referenced.

Speed Up the Process with Artificial Intelligence

Using a comprehensive set of tags, your images are automatically identified and tagged by our AI and can be easily searched to find what you are looking for later. Or, create your own unique tags and group common tags together.

Easily Organize Maps and Progress

With AgileMapper, your organization has one account for as many users as you'd like to add. You can create maps, add locations, upload photos, and assign teams right from your desktop.
