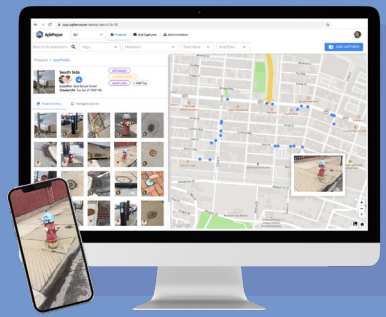
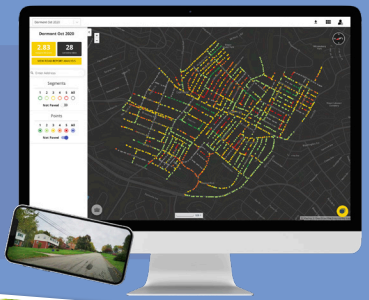
TRANSFORM YOUR VISUAL INFRASTRUCTURE DATA INTO MEANINGFUL MAPS

SOLUTIONS



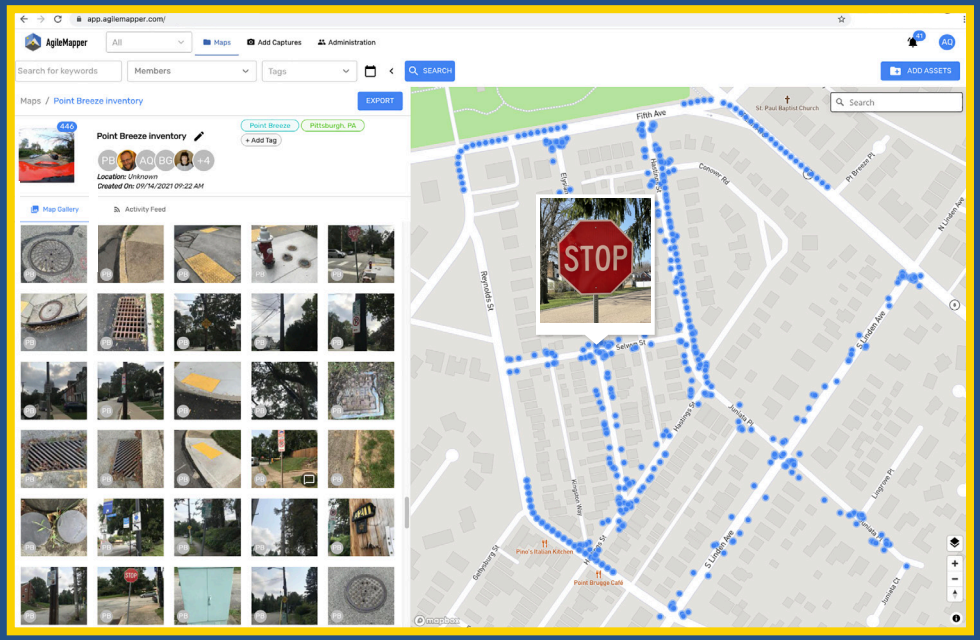
AgileMapper

AgileMapper can help you begin your digital twin with mapped visual data for collaboration, engagement, and evaluation. Using the power of artificial intelligence, these interactive maps empower you to make data-driven decisions about your environment, and provide digital solutions for industries like civil engineering, utilities, insurance, construction, and the public sector.



RoadWay

RoadWay automates your road assessments, providing objective analysis so you can make data-driven decisions. It has enabled over 250 governments worldwide to proactively manage and plan their road maintenance.



MEET AgileMapper

Organize your visual data with geo-tagged, user-referenced and time-stamped images on an interactive map.

Then sort, group, and search using the power of artificial intelligence to improve transparency and accountability between the field and the office.

Collect in the field or use already existing visual data to begin your digital twin.

HOW IT WORKS

UNLOCK YOUR DATA

Capture your image data using a cellphone, GoPro, 360˚ camera, drone footage, or use already existing visual data. Upload it via our mobile or desktop app and let our AI go to work!

BUILD A VIRTUAL WORLD

Each image is automatically geo-tagged, time-stamped, and user-referenced on a map with common tags applied by our AI. You can also apply custom tags for more granularity.

GENERATE REPORTS

Sort, report, and communicate locations and conditions across teams to create actionable and trackable plans.

WHO IT'S FOR

FOR CIVIL ENGINEERING Your community has lots of moving parts that need documented and monitored – from street signs and fire hydrants to bike trails and playgrounds. AgileMapper can help you quickly and accurately keep track of their location and condition. Your teams in the field can contribute to specific project maps while you manage progress from your desk.

FOR GOVERNMENT Many projects happening simultaneously in multiple locations require organization and visual documentation of their phases and progress. AgileMapper is the tool your teams and subcontractors in the field can rely on to accurately record and communicate conditions on site.

FOR CONSTRUCTION If you're managing multiple projects in many locations with different teams, progress and problems can be hard to keep track of. AgileMapper can help map images and track progress across all of your projects and teams.
